PROFESSIONAL SUMMARY

3rd-year Digital Game Design student with hands-on experience in the complete solo development cycle, from prototyping to commercial Steam release. Specialized in Unity and C#, with a strong focus on multiplayer networking (Unity Mirror, Steam P2P) and 3D modeling. Proven ability to architect game mechanics, optimize systems, and successfully manage end-to-end product lifecycles as an independent developer.

TECHNICAL SKILLS

Programming & Logic:	C#, Object-Oriented Programming, Gameplay Programming, AI Behaviors, Game Loop Optimization
Engine & Tools:	Unity3D, Level Design, Rapid Prototyping, UI/UX Implementation
Networking & Co-op:	Unity Mirror, Steam P2P, Multiplayer Synchronization
Art & Audio:	Blender (3D Modeling, Texturing, Animation), 2D Asset Creation (Pixel Art), Audacity
Publishing & SDKs:	Steamworks, Google Play Console, IAP Integration, Ad Networks

FEATURED PROJECTS & EXPERIENCE

Independent Game Developer (Solo Indie Dev) - PC & Steam

2022 - Present

- MEDUSUS! (PC/Steam):** Developed a playable demo featuring complex prop-hunt and asymmetrical hide-and-seek mechanics from scratch within an intensive 3-week period, set to participate with a playable demo in the upcoming **Steam Next Fest (October 2026)**. Built the core multiplayer foundation utilizing Unity Mirror.
- Frick It (PC/Steam):** Architected and developed 3D environments, character controllers, core survival mechanics, and a Steam P2P co-op network infrastructure entirely solo over 1.5 years, successfully launching the title commercially.

Mobile Game Developer - Android & Google Play

2020 - 2022

- Stick Of Duty: Zombies:** Programmed a 2D ragdoll action game and integrated an online multiplayer infrastructure utilizing international servers for real-time character synchronization.
- Hypercasual Portfolio (Right Ball, MyTeammates, etc.):** Published multiple titles on the Google Play Store, managing their entire lifecycles by successfully integrating In-App Purchases (IAP) and advertising SDKs.

Academic Projects & Game Jams

- Albino And Curse:** Designed and developed a 2D turn-based RPG featuring Undertale-style pixel-art combat mechanics from scratch within a few weeks for a university module, handling both programming and 2D asset creation.
- Game Jam Prototypes:** Developed multiple rapid prototypes both individually and within teams under strict 48-72 hour deadlines, focusing on fast iteration, core mechanics implementation, and rapid problem-solving under pressure.

EDUCATION

European University of Lefke

Expected Graduation: 2027

Bachelor's Degree in Digital Game Design | 3rd Year Student | CGPA: 3.67 / 4.00

LANGUAGES

Turkish:	Native
English:	Upper-Intermediate (Technical Working Proficiency)
