PROFESSIONAL SUMMARY

3rd-year Digital Game Design student with hands-on experience in the complete solo development cycle, from prototyping to commercial Steam release. Specialized in Unity and C#, with a strong focus on multiplayer networking (Unity Mirror, Steam P2P) and 3D modeling. Proven ability to architect game mechanics, optimize systems, and successfully manage end-to-end product lifecycles as an independent developer.

TECHNICAL SKILLS

Programming & Logic:	C#, Object-Oriented Programming, Gameplay Programming, AI Behaviors, Game Loop Optimization
Engine & Tools:	Unity3D, Level Design, Rapid Prototyping, UI/UX Implementation
Networking & Co-op:	Unity Mirror, Steam P2P, Multiplayer Synchronization
Art & Audio:	Blender (3D Modeling, Texturing, Animation), 2D Asset Creation (Pixel Art), Audacity
Publishing & SDKs:	Steamworks, Google Play Console, IAP Integration, Ad Networks

FEATURED PROJECTS & EXPERIENCE

Independent Game Developer (Solo Indie Dev) - PC & Steam

2022 - Present

- MEDUSUS! (PC/Steam):** Developed a playable demo featuring complex prop-hunt and asymmetrical hide-and-seek mechanics from scratch within 3 weeks. Slated to participate with a playable demo in the upcoming **Steam Next Fest (October 2026)**. Architected core multiplayer synchronization via Unity Mirror.
- Frick It (PC/Steam):** Solely developed and commercially published a co-op survival title over a 1.5-year cycle, building custom character controllers, dynamic environment logic, and a Steam P2P networking infrastructure.

Academic Projects & Game Jams

- The Mindbreak:** Led a 4-person team during a tight game jam environment; spearheaded the core game design, architectural logic, and gameplay programming while delegating audio and visual asset pipelines.
- Albino And Curse:** Co-developed a 2D turn-based RPG featuring Undertale-inspired pixel-art combat as a 2-person university module project; handled all programming and 2D combat assets, followed by an academic presentation.
- The Amber Path:** Engineered an atmospheric, narrative-driven puzzle experience under strict 48-hour constraints, delivering clean gameplay loops and interactive environmental triggers.
- The Basement:** Created an early-stage solo jam prototype focusing on atmospheric tension, rapid modular level design, and fast state-machine programming under extreme time limits.

Mobile Game Development - Android

- Stick Of Duty: Zombies:** Built a 2D ragdoll action title integrating online multiplayer infrastructure using external game servers for smooth player position synchronization.
- Hypercasual Portfolio (Right Ball, MyTeammates, etc.):** Developed and launched multiple arcade titles on Google Play, implementing monetization pipelines with In-App Purchases (IAP) and ad mediation SDKs.

EDUCATION

European University of Lefke

Expected Graduation: 2027

Bachelor's Degree in Digital Game Design | 3rd Year Student | CGPA: 3.67 / 4.00

LANGUAGES

Turkish:	Native
English:	Upper-Intermediate (Technical Working Proficiency)
